EPAL control staples

QUALITY CONTROL

The international pool of EPAL load carriers is the only load carrier pool in the world subject to independent quality assurance by external inspection companies. This is the only way for EPAL load carriers to guarantee the consistently high quality that they offer the markets.

ISPM 15

Compliance with the ISPM 15 standard is the most essential condition for the unrestricted use of load carriers in the international movement of goods. All EPAL Euro pallets are therefore produced according to the stringent specifications of the IPPC and can thus be deployed around the globe. Local plant protection agencies will provide information on the countries that recognise the IPPC standard.
